**SYNTHESIS OF PARTS 11-20 OF THE ADDITIONS AND CORRECTIONS TO
LIENHARD & SMITHERS, 2002: "PSOCOPTERA (INSECTA) – WORLD
CATALOGUE AND BIBLIOGRAPHY"**

Charles LIENHARD (Geneva Natural History Museum, Switzerland)
E-mail: charleslienhard@bluewin.ch

Abstract: Since the volume Psocoptera (Insecta) – World Catalogue and Bibliography was published by the Geneva Natural History Museum in 2002, twenty supplementary papers of additions and corrections have appeared in Psocid News. All available literature on Psocoptera was treated in the same style as the Catalogue (listed taxonomically, faunistically and thematically). For ease of use a synthesis of the first ten supplements was published as Special Issue 3 of Psocid News (Lienhard, 2016d). The present compilation offers a synthesis of the supplements 11 to 20 (published annually between 2012 and 2021 in Psocid News No. 14-23) and it contains a complement to the Subject Bibliography published in Psocid News Special Issue 2 (Lienhard, 2016c), i. e. a synthesis of the annual subject bibliographies published in Psocid News No. 19-23. In general, each part of the "Additions to the Catalogue" presents the information in the style of Lienhard & Smithers (2002), according to the criteria mentioned there (pp. ix-xli) and using the same abbreviations (pp. xl-xli). For each family, newly published changes (i.e. published after the synthesis presented by Lienhard, 2016d) concerning supra-generic taxa are mentioned at the beginning of the family treatment. For genus-group names and species-group names already mentioned by Lienhard & Smithers (2002) and Lienhard (2016d) only the authors are cited. For each new name the complete reference (author, year, page) is given in its **first entry**, where a new genus-group name is marked with two asterisks (**) and a new species-group name with one asterisk (*). In **further entries** these names lack asterisks but authors and years are mentioned. Genera are listed alphabetically within each family. Species are listed alphabetically within each genus. Species names are usually cited in the combination used by Lienhard & Smithers (2002), if not an explicit change of combination (or a new synonymy) was published since.

No nomenclatural act is published in the "Additions to the Catalogue" because articles in Psocid News are not considered as published works under the rules of ICBN (see Editorial of Psocid News: Disclaimer); only some mandatory changes are made (e. g. adaptation of species name endings to the grammatical gender of the genus name). However, occasionally recommendations to future revisers are given concerning nomenclatural acts which eventually should be published.

Only papers which I have seen are analysed for the "Additions to the Catalogue", or those where the matter they deal with is clearly indicated in the title or in the abstract. References to the papers which I have not seen are marked with "(Not seen)" or "(Only abstract seen)" in the synthesis of the "Additions to the Bibliography". Complete bibliographical references to publications cited in the present paper, which are not listed in this synthesis, can be found in the World Bibliography (Lienhard & Smithers, 2002: 493-664) or in the synthesis of Additions 1-10 (Lienhard, 2016d).

List of countries mentioned in Parts 11-20 of the "Additions and Corrections to the World Catalogue"

Additions to the Bibliography (Synthesis of Parts 11-20)

Remarks: Papers with two authors are listed in alphabetical order of second authors after the chronological list of papers with the first author as unique author. Papers with more than two authors (i. e. "first author *et al.*"-papers) are listed chronologically after the two-author papers. References to papers published in the same year are distinguished by suffix-letters added to the publication year; the suffix-letters used in this synthesis are the same as those used in the initial parts of the "Additions to Lienhard & Smithers, 2002" published in Psocid News.
